

Dear Patient/Clients,

We have made the difficult decision to close this clinic permanently this summer. If your student has an open treatment plan, we will communicate with you separately regarding the next steps to complete and close out care services. Your medical records will be available upon your request. To authorize the release of your records to a new provider, please complete the authorization form at the front reception area.

While we are closing the clinic, we remain committed to serving you and your community through our ongoing Community Counseling and Parenting services in the Schertz-Cibolo-Universal City area.

If you have any questions regarding this clinic closure and its impact on your family, you can reach out to us at ljohnson@mhmm.org.

Thank you, for the opportunity that Methodist Healthcare Ministries has had to support the well-being of students and families through our George Ricks School Based Health Center. We are grateful to have provided low-cost services to over 20,000 students over the years and have been blessed to have been a part of helping so many families take steps toward achieving their full potential for health and life.

Thank you,

Leticia Ortiz-Johnson

Vice President of Integrated Healthcare
