

METHODIST HEALTHCARE MINISTRIES

IMPROVING THE PHYSICAL,
MENTAL AND SPIRITUAL HEALTH
OF THOSE LEAST SERVED

Methodist Healthcare Ministries of South Texas, Inc. is a private, faith-based, not-for-profit organization dedicated to creating access to health care for the uninsured in South Texas through direct care services, community partnerships and strategic grant-making. Direct care includes primary care medical and dental services, support services like counseling, case management and social services, and recreation and enrichment, parenting programs and church-based community nursing programs.

Methodist Healthcare Ministries provides financial support through grant-making to organizations that are already effectively fulfilling the needs of the underserved in local communities through programs and services that they already operate.

Methodist Healthcare Ministries also works with similarly focused organizations and state government in developing more socially conscious public policy. The purpose is to change legislative perspectives and policies so that the root of the problems of the underserved is addressed for the long-term.

SÍ TEXAS PROJECT:

SOCIAL INNOVATION FOR A HEALTHY SOUTH TEXAS

Methodist Healthcare Ministries' Sí Texas: Social Innovation for a Healthy South Texas project, a Social Innovation Fund program, stimulates local solutions that improve both physical and behavioral health together, such as diabetes and depression.

Sí Texas focuses on integrated behavioral health models that are effectively improving health outcomes in communities with high rates of poverty, depression, diabetes, obesity and associated risk factors. The project targets twelve South Texas counties: Cameron, Hidalgo, Starr, Willacy, Kenedy, Brooks, Jim Hogg, Zapata, Duval, Jim Wells, Kleberg and Webb. The project is the result of an investment from the Social Innovation Fund of the Corporation for National and Community Service, and leverages both federal and non-federal dollars to South Texas that otherwise would not have been available to the region.

The Social Innovation Fund (SIF) combines public and private resources to grow the impact of innovative,

community-based solutions that have compelling evidence of improving the lives of people in low-income communities throughout the United States. The SIF invests in three priority areas: economic opportunity, healthy futures, and youth development. To learn more, visit nationalservice.gov/SIF.

Corporation for NATIONAL & COMMUNITY SERVICE The Corporation for National and Community Service is a federal agency that engages more than 5 million Americans in service and champions community solutions through its AmeriCorps, Senior Corps, Social Innovation Fund and Volunteer General Fund programs, and leads the president's national call to service initiative, United We Serve. For more information, visit NationalService.gov.

The University of Texas Rio Grande Valley (UTRGV) was created by the Texas Legislature in 2013 in a historic move that combines the resources and assets of UT Brownsville, UT Pan American and the Regional Academic Health Center. The associated Family Medicine Residencies prepare physicians to serve underserved communities with team-based inter-professional and integrated care. Funds received from the Sí Texas Project will help implement the nationally recognized Primary Care Behavioral Health model in two of the residencies' primary care locations in Hidalgo County. This model integrates care through a consultant model in which behavioral health professionals function as consultants to primary care providers and their patients. At UTRGV, this model is implemented at family practice clinics where medical students are placed for their residencies.
